# Requirements and testing

## Practice exercise

**Isaac Álvarez Diz**

isaac.alvarez-diz@sogeti.com

**Albert Tort Pugibet**

albert.tort-pugibet@sogeti.com

## Scenario

Imagine that you're hired as a Test Engineer working for Renfe.com project. You're asked for the following tasks:

- Perform a dynamic testing session in [www.renfe.com](http://www.renfe.com), testing only 2 User Stories.
- Once testing session is conducted, perform static testing on all User Stories provided in the document. Create a list of defects from requirements and modify User Stories accordingly.
- Perform another dynamic testing session by selecting 2 of the User Stories modified in the step above.

## Support material

You are provided with the following support material:

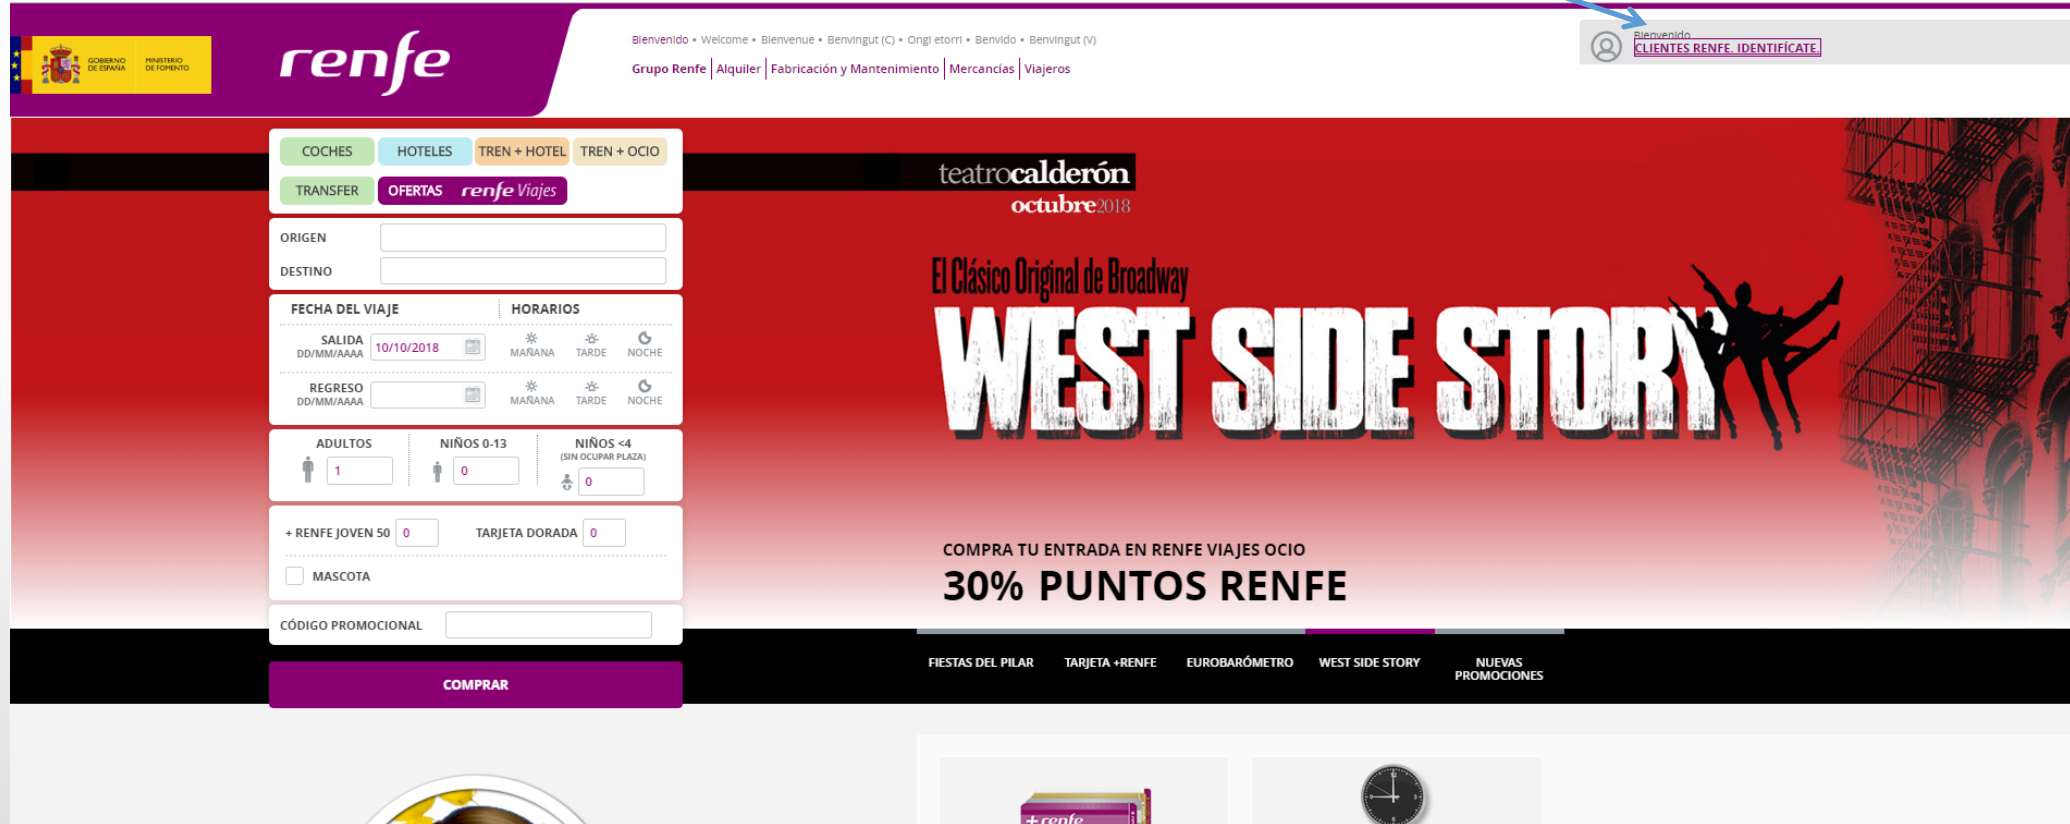

- List of 5 User Stories from renfe.com
- Session sheet model

# Deliverables

You should provide the following deliverables:

- 2 testing sheets for both dynamic test execution sessions done.
- Testing sheet for Static testing performed on User Stories.
- Alternative list of User Stories.

Access to both sign-up and sign-in processes.
